1. COURSE INFORMATION

During the one-year duration of Mechanic Diesel trade a candidate is trained on professional skills & knowledge, Engineering Drawing, Workshop Calculation & Science and Employability skill related to job role. In addition to this a candidate is entrusted to undertake project work and extracurricular activities to build up confidence. The Broad components covered during the course are given below: -

The Trainees will cover the safety aspect in general and specific to the trade, identification of tools & equipment, raw materials used. The trainee will perform Measuring & marking by using various Measuring & Marking tools. The trainee will be able to plan and perform basic fastening and fitting operations. Familiarize with basics of electricity, test and measure the electrical parameter. Skilling practice on maintenance of batteries being done. Practice making various welding joints by using Arc and gas welding. Trace and identify various hydraulics and pneumatics components and identify components in Air and Hydraulic Brake system. Identify various types of vehicle.

The candidate will be able to perform practice on dismantling Diesel Engine of LMV as per given standard procedures. Able to achieve skill on Overhauling of Cylinder Head , valve train , Piston, connecting rod assembly, crankshaft, flywheel and mounting flanges, spigot and bearings, camshaft etc. practice reassembling all parts of engine in correct sequence as per workshop manual. Perform testing on engine. Also the trainee practice on repair and maintenance of Cooling, lubrication, Intake & Exhaust system of Engine. Perform maintenance of diesel fuel system, FIP, Governor and monitor emission of vehicle. Practice on repair, maintenance and overhaul of Starter, alternator and perform Execute troubleshooting in engine of LMV/HMV.

2.1 GENERAL

The Directorate General of Training (DGT) under Ministry of Skill Development & Entrepreneurship offers a range of vocational training courses catering to the need of different sectors of economy/ Labour market. The vocational training programmes are delivered under the aegis of Directorate General of Training (DGT). Craftsman Training Scheme (CTS) with variants and Apprenticeship Training Scheme (ATS) are two pioneer schemes of DGT for strengthening vocational training.

Mechanic Diesel trade under CTS is one of the popular courses delivered nationwide through a network of ITIs. The course is of one-year duration. It mainly consists of Domain area and Core area. The Domain area (Trade Theory & Practical) imparts professional skills and knowledge, while Core area (Workshop Calculation and science, Engineering Drawing and Employability Skills) imparts requisite core skill, knowledge and life skills. After passing out of the training programme, the trainee is awarded National Trade Certificate (NTC) by DGT which is recognized worldwide.

Candidates broadly need to demonstrate that they are able to:

- Read & interpret technical parameters/documentation, plan work, identify necessary materials and tools;
- Perform task with due consideration to safety rules, accident prevention regulations and environmental protection stipulations;
- Apply professional knowledge, core skills & employability skills while performing the job.
- Check the components as per workshop manual, identify and rectify errors and repair/replace components.
- Document the technical parameters related to the task undertaken.

2.2 PROGRESSION PATHWAYS

- Can join industry as Technician and will progress further as Senior Technician, Supervisor and can rise up to the level of Manager.
- Can become Entrepreneur in the related field.
- Can join Apprenticeship programme in different types of industries leading to National Apprenticeship certificate (NAC).

- Can join Crafts Instructor Training Scheme (CITS) in the trade for becoming instructor in ITIs.
- Can join Advanced Diploma (Vocational) courses under DGT as applicable.

2.3 COURSE STRUCTURE

Table below depicts the distribution of training hours across various course elements during a period of one-year:

SNo.	Course Element	Notional Training Hours
1	Professional Skill (Trade Practical)	1000
2	Professional Knowledge (Trade Theory)	280
3	Workshop Calculation & Science	80
4	Engineering Drawing	80
5	Employability Skills	160
	Total	1600

2.4 ASSESSMENT & CERTIFICATION

The trainee will be tested for his skill, knowledge and attitude during the period of course through formative assessment and at the end of the training programme through summative assessment as notified by the DGT from time to time.

a) The **Continuous Assessment** (Internal) during the period of training will be done by **Formative Assessment Method** by testing for assessment criteria listed against learning outcomes. The training institute has to maintain an individual trainee portfolio as detailed in assessment guideline. The marks of internal assessment will be as per the formative assessment template provided on www.bharatskills.gov.in

b) The final assessment will be in the form of summative assessment. The All India Trade Test for awarding NTC will be conducted by Controller of examinations, DGT as per the guidelines. The pattern and marking structure is being notified by DGT from time to time. **The learning outcome and assessment criteria will be the basis for setting question papers for final assessment. The examiner during final examination will also check** the individual trainee's profile as detailed in assessment guideline before giving marks for practical examination.

2.4.1 PASS REGULATION

For the purposes of determining the overall result, weightage of 100% is applied for six months and one year duration courses and 50% weightage is applied to each examination for two years courses. The minimum pass percent for Trade Practical and Formative assessment is 60% & for all other subjects is 33%. There will be no Grace marks.

2.4.2 ASSESSMENT GUIDELINE

Appropriate arrangements should be made to ensure that there will be no artificial barriers to assessment. The nature of special needs should be taken into account while undertaking the assessment. Due consideration should be given while assessing for teamwork, avoidance/reduction of scrap/wastage and disposal of scrap/waste as per procedure, behavioral attitude, sensitivity to the environment and regularity in training. The sensitivity towards OSHE and self-learning attitude are to be considered while assessing competency.

Assessment will be evidence based comprising the following:

- Job carried out in labs/workshop
- Record book/ daily diary
- Answer sheet of assessment
- Viva-voce
- Progress chart
- Attendance and punctuality
- Assignment
- Project work

Evidences and records of internal (Formative) assessments are to be preserved until forthcoming examination for audit and verification by examining body. The following marking pattern to be adopted while assessing:

Performance Level	Evidence
(a) Weightage in the range of 60%-75% to be allotted during assessment	
For performance in this grade, the candidate should produce work which demonstrates attainment of an acceptable standard of craftsmanship with occasional guidance, and due regard for safety procedures and practices	<ul style="list-style-type: none"> • Demonstration of good skill in the use of hand tools, machine tools and workshop equipment. • 60-70% accuracy achieved while undertaking different work with those demanded by the component/job. • A fairly good level of neatness and

	<p>consistency in the finish.</p> <ul style="list-style-type: none"> • Occasional support in completing the project/job.
<p>(b) Weightage in the range of 75%-90% to be allotted during assessment</p>	
<p>For this grade, a candidate should produce work which demonstrates attainment of a reasonable standard of craftsmanship, with little guidance, and regard for safety procedures and practices</p>	<ul style="list-style-type: none"> • Good skill levels in the use of hand tools, machine tools and workshop equipment. • 70-80% accuracy achieved while undertaking different work with those demanded by the component/job. • A good level of neatness and consistency in the finish. • Little support in completing the project/job.
<p>(c) Weightage in the range of more than 90% to be allotted during assessment</p>	
<p>For performance in this grade, the candidate, with minimal or no support in organization and execution and with due regard for safety procedures and practices, has produced work which demonstrates attainment of a high standard of craftsmanship.</p>	<ul style="list-style-type: none"> • High skill levels in the use of hand tools, machine tools and workshop equipment. • Above 80% accuracy achieved while undertaking different work with those demanded by the component/job. • A high level of neatness and consistency in the finish. • Minimal or no support in completing the project.

Mechanic, Diesel Engine; Oil Engine, Fitter repairs services and overhauls diesel or oil engines for efficient performance as prime mover to drive machinery and equipment. Examine engine to locate defects, using various tools and instruments. Dismantles or partly dismantles it to remove damaged or worn out parts and replaces or repairs them.

Grinds valve and assembles parts, doing supplementary tooling and other functions as necessary to ensure accuracy of fit. Installs assembled or repaired engine in position and connects pulley or wheel to propulsion system. Starts engine, tunes it up and observes performance noting different meter readings such as temperature, fuel level, oil pressure, etc. and sets it to specified standard for optimum performance. Checks, adjusts and lubricates engine periodically and performs such other functions to keep engine in good working order. May solder or braze parts and service diesel fuel pumps and injectors.

Additionally, since diesel engines are starting to incorporate electronic components, programs usually give students a chance to take courses in electrical systems and computer diagnostic software.

Plan and organize assigned work and detect & resolve issues during execution in his own work area within defined limit. Demonstrate possible solutions and agree tasks within the team. Communicate with required clarity and understand technical English. Sensitive to environment, self-learning and productivity.

4. GENERAL INFORMATION

Name of the Trade	MECHANIC DIESEL
Trade Code	DGT/1006
NCO - 2015	7233.0400
NSQF Level	Level-4
Duration of Craftsmen Training	One year (1600 Hours)
Entry Qualification	Passed 10 th class examination with Science and Mathematics or its equivalent.
Minimum Age	14 years as on first day of academic session.
Eligibility for PwD	LD, LC, DW, AA, LV, DEAF
Unit Strength (No. Of Student)	24 (There is no separate provision of supernumerary seats)
Space Norms	210 Sq. m (Including parking area)
Power Norms	4.8 KW
Instructors Qualification for

5. LEARNING OUTCOME

Learning outcomes are a reflection of total competencies of a trainee and assessment will be carried out as per the assessment criteria.

5.1 LEARNING OUTCOMES (TRADE SPECIFIC)

1. Check & perform Measuring & marking by using various Measuring & Marking tools (Vernier Callipers, Micrometre, Telescope gauges, Dial bore gauges, Dial indicators, straightedge, feeler gauge, thread pitch gauge, vacuum gauge, tire pressure gauge.)Following safety precautions.
2. Plan & perform basic fastening & fitting operation by using correct hand tools, Machine tools & equipment.
3. Trace and Test all Electrical & Electronic components & circuits and assemble circuit to ensure functionality of system.
4. Join components by using Arc & Gas welding.
5. Trace & Test Hydraulic and Pneumatic components
6. Check & Interpret Vehicle Specification data and VIN. Select & operate various Service Station equipment.
7. Dismantle & assemble of Diesel Engine from vehicle (LMV/HMV) along with other accessories (torqueing methods, handling parts).
8. Overhaul, service and testing Diesel Engine, its parts and check functionality.
9. Trace, Test & Repair Cooling and Lubrication System of engine (types of coolants and oils relevant to the engines).
10. Trace & Test Intake and Exhaust system of engine.(cleaning egr valves, exhaust inlet valves, ports and manifolds)
11. Service Diesel Fuel System and check proper functionality (calibration of mechanical and electronic pumps, checking injectors, filters)
12. Plan & overhaul the stationary engine and Governor and check functionality.
13. Monitor emission of vehicle and execute different operation to obtain optimum pollution as per emission norms.
14. Carryout overhauling of Alternator and Starter Motor.
15. Diagnose & rectify the defects in LMV/HMV to ensure functionality of vehicle.

6. ASSESSMENT CRITERIA

LEARNING OUTCOMES	ASSESSMENT CRITERIA
1. Check & perform Measuring & marking by using various Measuring & Marking tools (Vernier Calliper, Micrometer, Telescope gauges, Dial bore gauges, Dial indicators, straightedge, feeler gauge, thread pitch gauge, vacuum gauge, tire pressure gauge.) Following safety precautions.	Plan the working principles of measuring instruments and special tools required for auto workshop.
	Select, care and use of measuring instrument.
	Set up the measured value with workshop manual and quality concepts and proper safety.
	Carry out decision on whether to replace or not.
2. Plan & perform basic fastening & fitting operation by using correct hand tools, Machine tools & equipments.	Describe the purpose, use of auto hand tools.
	List the safety rules for hand tools.
	Select the correct tool for the job.
	Set up the tacked pieces in specific position.
	Joint components by Brazing, Soldering, Riveting as per given drawing.
	Produce components by different operation (Drilling, Reaming, Taping, Dieting)
3. Trace and Test all Electrical & Electronic components & circuits and assemble circuit to ensure functionality of system. Charge and test batteries used in vehicle.	Plan and prepare as per procedure and safety methods of soldering the cable ends using an electric soldering iron.
	Use crimping tool to make a circuit joint.
	Explain the connection of an ammeter, voltmeter, and ohmmeter in a circuit trouble shooting.
	State open & short circuit, series and parallel circuits.
	Verify DC series & parallel circuits and its characteristics.
	Check out the open and short circuits in the lighting circuits.
	Verify ohm's law and measure resistance using rheostat.
	Check the voltage drop in the auto electrical system by using multimeter.
	Trace the auto electrical components by using vehicle wiring circuits.

	Check the condition of the solenoid switch in the starting system.
	Determine the forward to reverse resistance ratio of diodes and identify good / bad diodes.
	Perform battery charging and check
4. Join components by using Arc & Gas welding.	Determine the principles, process of different welding process applicable in automobile industry.
	Demonstrate the edge preparation for butt and fillets welds.
	Select the type and size of filler rod and flux/electrode, size of nozzle and gas pressure/welding current, preheating method and temperature as per requirement.
	Set and tack metals as per drawing.
	Deposit the weld maintaining appropriate technique and safety aspects.
	Cool the welded joint by observing appropriate cooling method. Use post heating, peening etc. as per requirement.
	Clean the joint and inspect the weld for its uniformity and different types of surface defects.
5. Trace & Test Hydraulic and Pneumatic components.	Demonstrate Brake System (Hydraulic& Air).
	Demonstrate Hydraulic Power Steering.
6. Check & Interpret Vehicle Specification data and VIN. Select & operate various Service Station Equipments	Identify of different type of vehicle.
	Identify the different vehicle specification data and information
	Demonstrate the garage, service station different equipment
7. Dismantle & assemble of Diesel Engine from vehicle (LMV/HMV) along with other accessories.Vehicle performance Test	Demonstrate safe handling of lifting equipments.
	Identify the problems in the vehicle
	Perform the periodic testing of lifting equipments.
	Judge whether this Engine needs overhaul or not
	Perform dispose the used engine oil and safety measures in disposal.
	Perform on vehicle Engine Tests to analyze need of Overall
	Perform sequencing and identifying parts at the time of dismantle and assemble.

	Then Dismantle of Engine & Overhaul is ok, refer below attached screen shot for your reference
8. Overhaul & service Diesel Engine, its parts and check functionality.(Judge weather this Engine needs overhaul or not)	<p>Remove accessories fitted to the engine prior to engine removal.</p> <p>Align the left hook of the crane with engine lifting bracket.</p> <p>Remove the engine mountings</p> <p>Remove the engine from vehicle.</p> <p>Mount the engine on the vehicle.</p> <p>Align and fit the gear box to the engine.</p> <p>Refit the accessories to the engine.</p> <p>Set the Timing of the Engine</p> <p>Overhaul Valve Actuating Mechanism (Hydraulic latch actuator).</p>
9. Trace, Test & Repair Cooling and Lubrication System of engine	<p>Overhauling of Radiator/ Recovery tank water pump, oil pump, air cleaner</p> <p>Check the engine oil pressure at different r.p.ms.</p> <p>Overhaul the Oil Pump.</p> <p>Set Checking & Top up coolant, Draining & refilling coolant.</p> <p>Testing cooling system pressure & Thermostat</p> <p>Cleaning & reverse flushing. Overhauling water pump and refitting and repairs to oil flow pipe lines and unions if necessary.</p> <p>Check proper functioning of radiator fan (Mechanical/ Electrical / viscous / belt drive).</p>
10. Trace & Test Intake and Exhaust system of engine	<p>Overhauling of manifolds, silencer and tail pipe, air compressor, air exhauster and inspect parts of air exhauster, turbo charger from vehicle.</p> <p>Overhauling of air filter, clean & refit air cooler, fuel filter assembly and replace filter elements</p> <p>Remove and replace EGR valve, Use Smoke meter to test emission from engine.</p>
11. Service Diesel Fuel System and check proper functionality.	<p>Overhauling fuel feed pump, fuel injector pump.</p> <p>Test injectors, check the injection timing by the spill cut off method</p>

12. Plan & overhaul the stationary engine and Governor and check functionality	Start engine, adjust idling speed.
	Overhaul the Governor (Mechanical & Pneumatic)
	Set the Engine Timing.
	Check performance of engine off load.
	Servicing of the cylinder and replace the defective parts.
13. Monitor emission of vehicle and execute different operation to obtain optimum pollution as per emission norms.	Check vacuum pump for its functioning.
	Perform troubleshooting of EVAP Canister.
	Inspect PCV hose, inspect PCV Valve and check for vacuum.
	Clean the PCV valve and replace if required.
	Inspect & clean EGR.
14. Carryout overhauling of Alternator and Starter Motor.	Trace the circuit from the alternator to the battery.
	Perform servicing of starter motor.
	Perform servicing of alternator and test its performance.
	Check belt condition and replace as per requirement.
15. Diagnose & rectify the defects in LMV/HMV to ensure functionality of vehicle.	Plan and diagnose the problem if engine not starting.
	Diagnose high fuel consumption and engine overheating.
	Diagnose for excessive oil consumption and low/high engine oil pressure.
	Diagnose for abnormal engine noise.
	Diagnose for engine's poor performance.
