RATIONALE

Core skills enhance knowledge, analytical ability, problem solving ability, understanding or comprehending scientific principles and drawings & designs also. At the same time it creates the base for achieving Hard skills. To carry out any skill related task knowledge about basic Engineering Drawing is essential as drawing is the language of engineers.

Knowledge of Engineering Drawing complements the skills of an Artisan / Trade person. More importantly, ability to read drawing increases the productivity of a person besides enhancing confidence to perform task competently.

Recognizing this importance, the core skills (Engineering Drawing) made an integral part of all Engineering Trades under DGT. The syllabus of Engineering Drawing is common for first year for all Engineering Trades. The syllabus of 2nd year are made trade group specific.

LEARNING OUTCOMES AND ASSESSMENT CRITERIA

ENGINEERING DRAWING	
LEARNING OUTCOME	ASSESSMENT CRITERIA
1. Read and apply engineering drawing for different application in the field of work.	Read & interpret the information on drawings and apply in executing practical work.
	Read & analyze the specification to ascertain the material requirement, tools and assembly/maintenance parameters.
	Encounter drawings with missing/unspecified key information and make own calculations to fill in missing dimension/parameters to carry out the work.
